Our Company

Canadian Bearings is the leading distributor in Canada of ball and roller bearings and power transmission equipment. It gained this prominent position by providing industry quality products at an honest price and with the best service available anywhere in North America.

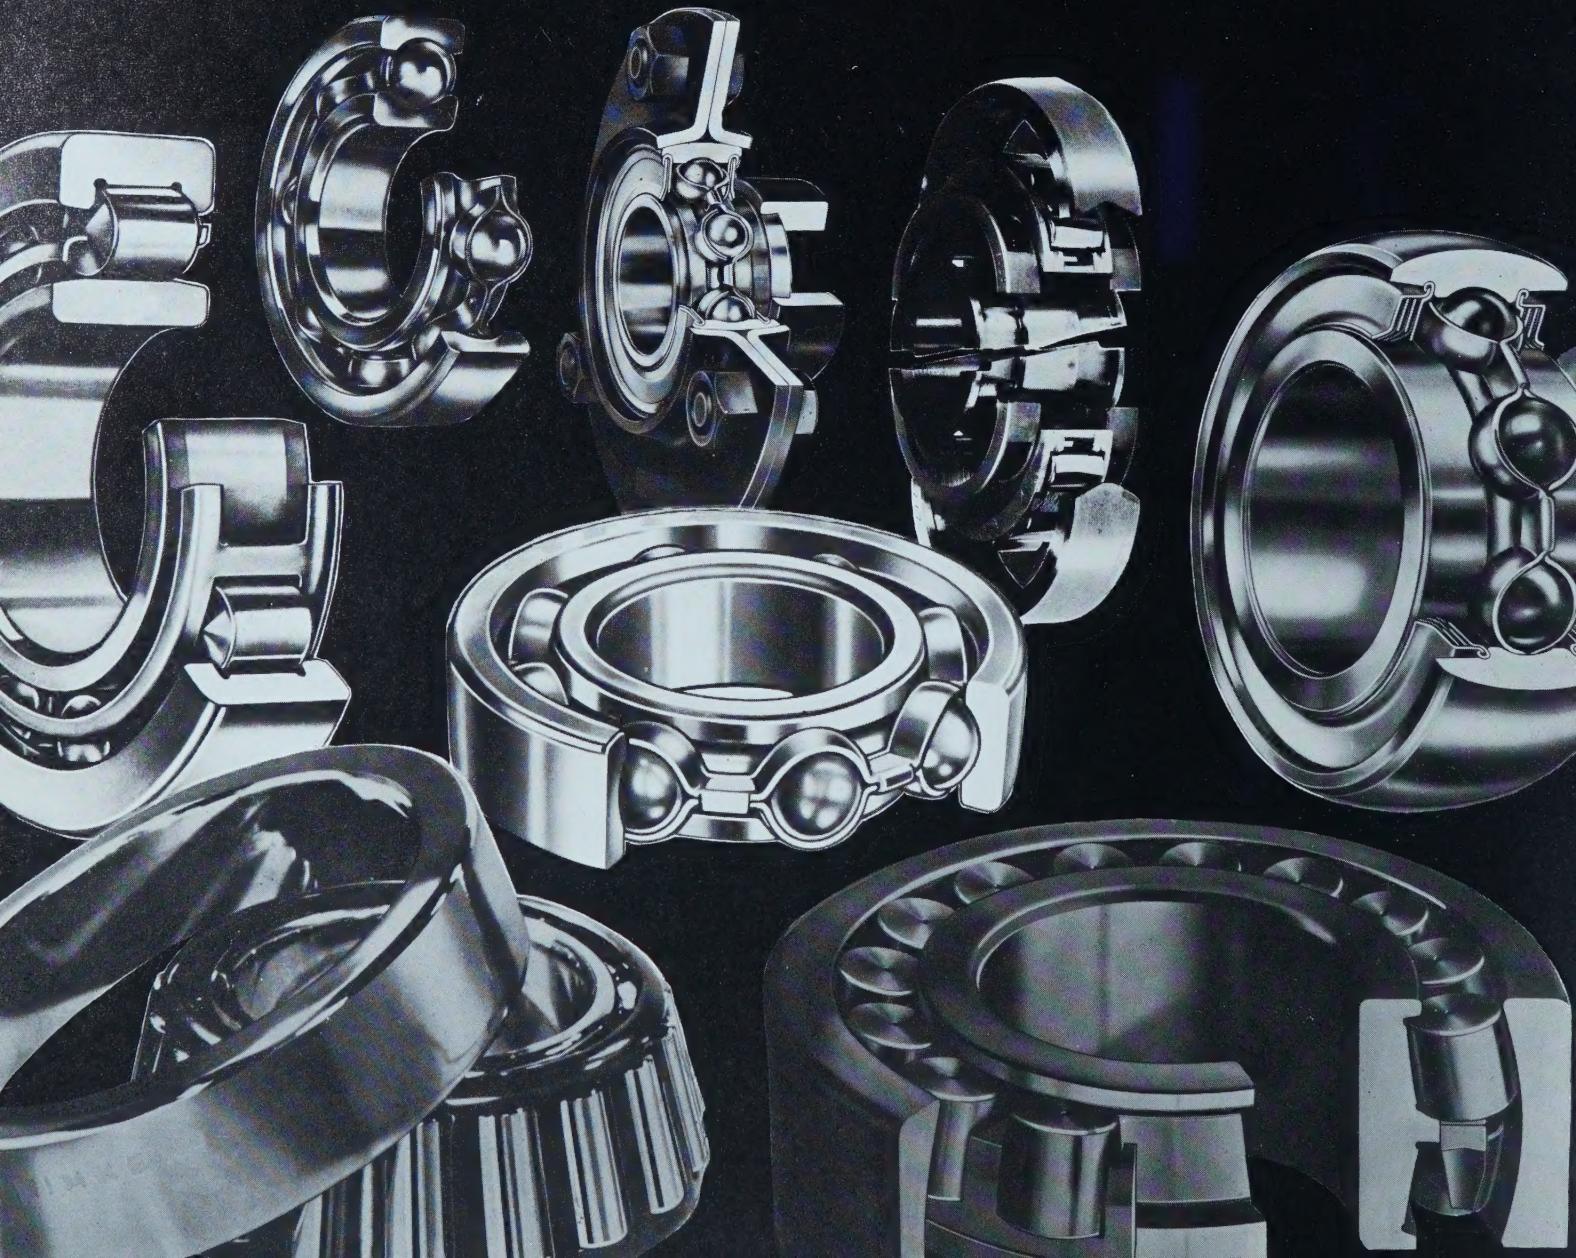

Established in 1947 in downtown Toronto, Canadian Bearings now has three branches in Toronto (Scarborough, Lakeshore and Malton) and one each in St. Catharines, Hamilton, Peterborough, North Bay and Kitchener.

The Company was acquired in July 1969 by Hugh Russel Limited a Canadian Company, owned and operated by Canadians, and since then, it has embarked upon a program of renewed expansion and development.

As the authorized distributor for the world's leading manufacturers of bearings and power transmission products, Canadian Bearings maintains large inventories of a wide range of product types and sizes throughout an expanding network of strategically located "Convenience Centres."

These centres are staffed by technically trained, service-oriented personnel, offering many years of experience in the selection and application of bearings and other power transmission products. These services are available on a 24-hour emergency basis.

All of this adds up to an extra measure of Reliability, Know-How, Service and Profit for the growing family of Canadian Bearings Customers.

We represent
